

My CTY Summer Program Impressions

Vít Všíanský, Gymnázium Matyáše Lercha, Brno

The CTY Summer Program at Princeton University gave me a lot: new friends, great experiences, a lot of fun and most of all - inspiration. Everybody and everything was truly inspiring. It's really hard to describe it in a text, you need to experience it for yourself.

My course was epidemiology and my professor was Dr. Nwangwu. I have to write a few words about our teacher first because he is such a great person. Not only can he teach very well but he also motivates the students and explains his work as an epidemiologist in a conceivable and interesting way. He really is a man in the right place.

The class experience overall was amazing. I didn't know anything about epidemiology when I first came here but after these three weeks my knowledge of the subject is fairly big because of the 7 hours of lecture every weekday. Apart from the class time, other activities like sports, art, games and so on were also really enjoyable.

Only negative I can think of right now would be the very strict rules, which prohibited free movement around the campus and also a few other things, that I think shouldn't have been regulated. In the end it didn't matter that much anyways because of the intensive program during the whole day. There simply wasn't enough free time to roam around Princeton.

I have to thank AFCSLS for giving me this opportunity, it definitely was an unforgettable experience.
